## Summary

Experienced Software Developer with over 2+ years, specializing in designing, developing, and maintaining dynamic applications. Proficient in a range of programming languages and development frameworks, with a strong focus on delivering high-quality, scalable solutions. Committed to leveraging technical skills and industry knowledge to drive innovation and enhance project outcomes.

## EDUCATION

### Bachelor of Technology (B. Tech) in Computer Science

Oriental College of Technology, Bhopal, Madhya Pradesh, India

**CGPA: 8.5/10**

**2018 - 2022**

### Senior Secondary Education (12th)

Scholar Home School, Satna, (M.P)

**Percentage: 79.9%**

**2016 - 2017**

### High School Education (10th)

Scholar Home School, Satna, (M.P)

**Percentage: 70%**

**2014 - 2015**

---

## WORK EXPERIENCE

Capgemini | Senior Analyst

Navi Mumbai, India

**June 2022 – Current**

- Ensured the maintenance and development of a web application.
  - Worked closely with cross-functional teams in driving the creation and implementation of innovative new features.
  - Achieved successful delivery of the application.
  - Participated in technical design and architecture conversations.
  - Identified and fixed issues with software defects.
  - Optimized user interface for better user experience.
  - Enhanced skills and knowledge through participation in training and development opportunities.
- 

## PROJECTS

### Authentication System

**Technologies: PHP, CodeIgniter 4**

- Developed a secure user authentication system allowing users to register, log in, and manage their accounts
- Implemented role-based access control (RBAC) to restrict access to specific parts of the application based on user roles (e.g., admin, user)
- Integrated PHP's password\_hash() and password\_verify() for robust password management.

### E-commerce

**Technologies: Core PHP, MYSQL, HTML, CSS, jQuery**

- Product Listings: Users can browse a variety of products with detailed descriptions, images, and prices.
  - Search and Filter Options: Advanced search and filtering capabilities to help users find products quickly.
  - User Authentication: Secure login and registration system, with options for password recovery and user profile management.
  - Shopping Cart: Users can add products to a shopping cart, update quantities, and view the total cost.
  - Checkout Process: Streamlined checkout with payment integration Stripe and order confirmation.
  - Order Management: Backend system to manage orders, track order status, and handle customer inquiries.
  - Responsive Design: Optimized for both desktop and mobile devices to ensure a seamless shopping experience.
  - Admin Dashboard: Admin panel for managing products, users, and orders, with features for adding, editing, and deleting items.
  - Product Reviews: Option for users to leave reviews and ratings for products.
  - Notifications: Email or in-app notifications for order updates, promotional offers, and important announcements
-
